Hailed for its coiled eroticism and the moral claims it makes upon the reader, this mesmerizing novel is a story of love and secrets, horror and compassion, unfolding against the haunted landscape of postwar Germany. When he falls ill on his way home from school, fifteen-year-old Michael Berg is rescued by Hanna, a woman twice his age. In time she becomes his lover—then she inexplicably disappears. When Michael next sees her, he is a young law student, and she is on trial for a hideous crime. As he watches her refuse to defend her innocence, Michael gradually realizes that Hanna may be guarding a secret she considers more shameful than murder.

This is definitely one of those books that haunts the memory. It stays with you days after you read it. Its philosophical in tone. I think Hanna was a victim of circumstances & that Michael was too harsh in his judgement of her. At the beginning of the book she shows great compassion as she helps a vomiting Michael & walks him back home. When it is later revealed that she picked the weaker children to read to her before they were put to death, I think she was trapped by the horrible circumstances & reality of the Nazi regime, & that making their lives a little more livable before their untimely deaths was the only thing she had in her power to do to show compassion. There is also a lot of symbolism in the book. For example: Hanna is illiterate at a time when Germany's average citizen had a Bachelor's degree. As for her anger toward a young Michael Berg during their vacation, I think this was due to a feeling of helplessness. Put yourself in her shoes for a moment & imagine not being able to read at all. You are 100% reliant on your lover to read the signs to get where you're going & thus to get back from whence you came. You can't order from a menu. You wake up miles from home & that lover you are reliant on to read signs & order food has vanished & left you a piece a paper with writing on it, & you can't read it. You must feel stranded & hopeless. Thus when the young Mr. Berg returns he is surprised by an understandably irate Frau Schmidt. She is innocent to an extent, & her more guilty ex-coworkers get much more lenient sentences by contrast. Where does guilt begin or innocence win? I think that is an unanswerable question, & one for the history of not only Hanna, but all of mankind throughout all of history.
